

David Novak

Product Designer | UX Engineer

PROJECTS

Harvard Business Review

User Experience, design system, mobile development

2023

Developed and implemented UX research plan to update existing HBR Mobile App. Created new UI kit and design system and provided guidance on how to utilize it within the project. Implemented recommendations taking ownership of the Library view (design to code).

CloseKnit Health

Frontend development & design

2024 - 2025

Led the implementation of design into code, enhancing the user interface and improving the overall user experience of the application. Designed prototype for key stakeholders of the full healthcare journey within the app which included chat and booking features.

Culligan Quench

User Experience & development

2024

Redesigned and implemented a new inventory management app that improved efficiency and simplified the user experience and is now utilized in high-volume areas nationwide. Owned the full design life cycle.

Other projects available upon request
